Upōdghāta	Introduction

Preface

Everything Adi Shankaracharya has ever written is a gift to humanity. His logic and understanding of the Prasthānatraya remain undisputable. I was looking for a concordance regarding his explanations, although I could not find anything related. Based upon Adi Shankara's commentaries (bhāṣya) and inspired by Colonel A. Jacob's *Upanishad Vakya Kosha*, *A concordance to the principal Upanishads and Bhagavadgītā* and Bloomfield's *A Vedic Concordance*, I composed a unique concordance of the entire Prasthānatraya.

This vast compilation of terms with their text sources finally became an eight-volume work with 118.000 distinct Sanskrit/English words (vākya & bhāṣya) and approximately 1.000.000 references (made of 2.900 śloka/mantra segments).

All terms were written in the transliterated notation (IAST, International Alphabet of Sanskrit-Transliteration) and were mainly arranged according to the English alphabet to support even laypeople. The repetitions of specific Sanskrit and English expressions may appear confusing. It is not a publishing error but was deliberately taken into account to extract all unique words.

It should serve all who are interested in the traditional system of Advaita Vedanta.
